

# Narrate an Exhibit

The **VIKING** DVA-2WA Digital Announcer is perfect for narrating exhibits. It operates at the touch of a button and plays up to a 7.5 minute narration. Or, you can program the unit to repeat the narration on a timed or continual basis. For more flexibility, you can also record multiple narrations and program the unit to alternate between the narrations.

The DVA-2WA also includes a built-in 2 watt amplifier, eliminating the need to add supplemental amplification for each exhibit.

Recording the narration is easy. Simply use an electret microphone, carbon telephone handset, or download a recording from a tape recorder or PC sound card.

# VIKING's Digital Announcers

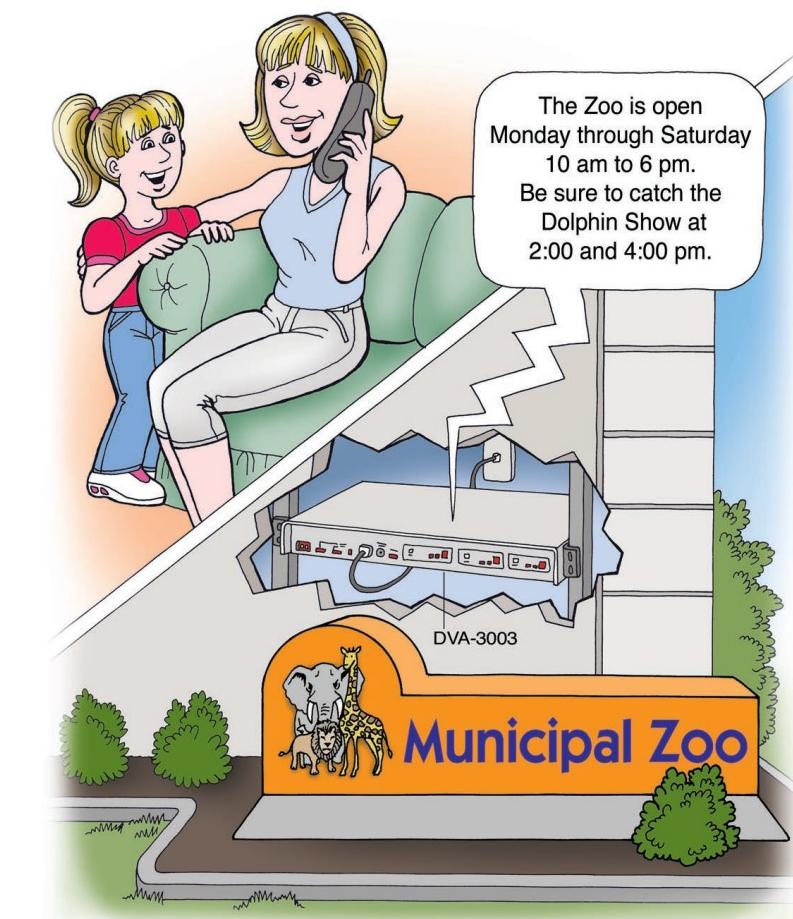

## Expand Your Creative Options

### Timed Voice Announcements Pack the Stands

The DVA-2WA can do more than just play on-demand narrations. Combine the DVA-2WA with our CTG-1 clock-timer and the DVA-2WA will play announcements at certain times throughout the day. Those announcements can greatly increase attendance at shows and educational demonstrations. Or, you can use the DVA-2WA and the CTG-1 to announce upcoming attractions, gift shop specials, and special admission packages.

### Promote Current and Upcoming Attractions

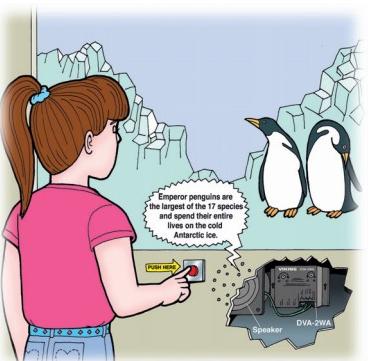

The DVA-2WA is perfect for promoting current or upcoming events while callers are on hold. With a total record time of up to 7.5 minutes, you can record one long message, or several short messages to play at timed increments.

For incoming calls, use the DVA-3003 Digital Announcer to answer up to three incoming lines and play informational messages such as zoo hours, ticket prices, group policies, etc.

## **VIKING Digital Announcers**

### **Tell the Story, Create the Mood, and Promote Your Events**

You've got lots of technology choices when it comes to providing interactive exhibits. But none are as easy or as cost effective as a **VIKING** Digital Announcer. Our DVA-2WA provides up to 7.5 minutes of digital non-volatile recording time. Use the DVA-2WA to narrate an exhibit, announce show times throughout the grounds, play sound effects or play music to create a certain mood.

You can trigger the DVA-2WA using a push button, or by tripping motion or infra-red sensors. You can also program the unit to play a message on a timed interval, a continuous basis, or on a time-of-day basis. Plus, you're not limited to playing a single message. You can record multiple messages in the 7.5 minute allotment and program the DVA-2WA to alternate between the messages.

The DVA-2WA simplifies your job even more by including a built-in 2 watt amplifier with adjustable volume control. That saves you money on every exhibit.

If your exhibits are in close proximity to one another, where the sound from one exhibit can interfere with one nearby, you can take advantage of the DVA-2WA's I/O function. By connecting the I/O ports on two DVA-2WA's, the units will shut off the playing unit when the second unit is started.

#### **Recording is Simple**

You have several options to record on the DVA-2WA. Use an electret microphone, a carbon telephone handset, or download a pre-recorded analog message from a tape recorder the sound card on a PC.

#### **Promote Current and Upcoming Events—on-site or on-hold**

In addition to playing promotional messages over your existing P.A. system, the DVA-2WA easily converts to a promotion-on-hold device for phone calls. Or, if you want even more power to promote your events by phone or give out important information, use out DVA-3003. That unit answers up to 3 incoming phone lines and plays promotional messages, gives driving and parking directions, zoo hours, and ticket prices.

#### **DVA-2WA**

- 7.5 minutes record time
- Built-in 2 watt amplifier
- On-demand, timed, or continuous play modes
- Promotion on hold capabilities

#### **DVA-3003**

- Answers 3 incoming phone lines.
- Plays 1-4 minute message on each line.
- Common message on all lines or separate message on each line.
